

## MEET MATRIX INTEGRATION

# IT experts who bring out the best in you

Nearly 50 years of helping people like you mature their IT have taught us exactly how to reach into the complex and pull forward the priorities, choices, and solves that help you operate and feel at your very best – confident, empowered, and in control. It's about you, and what we can do to supercharge you.

Frustration, fear, and uncertainty are normal in IT. That changes now.

When your organization's IT sits on your shoulders, so do the feelings of fear and anxiety over what could happen, and frustration over what is happening today. You could be too worried to take your PTO, too busy to take your lunch break, and too overwhelmed to plan for anything further out than tomorrow. The answer isn't a gimmick or a new tech stack. It's the right partner.

## What you get when you work with Matrix

### Your way, not ours

Your Matrix team starts by meeting you where you are. That means listening to your goals and preferences, plugging into your world, and then guiding you to the approach that will make it even better.

### Direct access to your expert guides

With "big IT" you work with whomever picks up the phone. With Matrix, you have direct access to your dedicated team of IT experts who build a rapport with both you and your environment, and guide you to your best decisions. They're also the same people who can be to your office right away when you need.

### Your path to IT maturity

We're not here to sell you projects; we're here to help you achieve IT maturity in your organization - where you feel confident, empowered, and in control of your today and your future. Whether we're your IT team or working with your IT team, we help you see around corners, build sustainable IT infrastructure, and chart your path forward.

## Get your Matrix Action Plan (MAP)

How do we guide you to your best decisions? It starts with outlining your MAP.

### 1. DEFINE YOUR DESTINATION

Your short-term and long-term goals, and what you're hoping to achieve in your organization and in your daily life at work

### 2. CHOOSE THE BEST PATH

We outline your options, the pros and cons, and our recommendations, and work with you to choose what's best

### 3. REPORT AND ADJUST ALONG THE WAY

You never have to wonder how it's going; you'll get frequent reports on progress and proactive recommendations for what to do next

### 4. REACH YOUR DESTINATION

Together, we'll help you expand your business, secure your data, and achieve a new level of IT maturity in your org

### 5. SET YOUR SIGHTS ON THE NEXT DESTINATION

Once you reach the top of one peak, you can better see the others in your path; there's always more room to grow

### WE'RE HERE TO HUMANIZE IT

Great IT isn't about bells and whistles. It's about people.

IT conjures up images of technology and servers. But it's really about people. People like you who run entire organizations and networks, and the people you trust to help you do it.

That's why at the center of every choice or recommendation we make as your expert guide is you. You, the human being who needs to feel confident and in control. You, the leader who helps chart the course for your organization. You, the protector of your organization's data and security. You, who looks out for everyone else. Our job is to build a relationship with you, and the solutions that come out of that relationship are exponentially better for it.
